

Outlook for Crater Lake Area

Special Statement

Numerous fires are contributing to poor air quality in the area. Avoid exposure when possible by limiting outdoor activities. Consider relocating to cleaner air if possible.

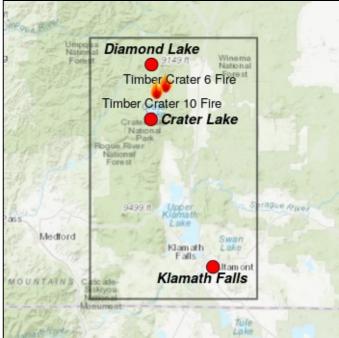

Fire

Timber Crater 6 and Timber Crater 10 are likely to produce minimal fire behavior due to established control lines. New starts and other existing fires in the area are anticipated to exhibit active fire behavior. If wind speeds increase, the potential for significant fire growth may occur.

Smoke

Widespread smoky conditions are expected over the larger geographic area for the next few days, as numerous large fires contribute to deteriorating air quality. The Timber Crater 6 and Timber Crater 10 fires should produce minimal smoke.

| | Yesterday | Sun | Forecast | Mon | Tue |
|------------------|------------|------|---|------|------|
| Station | hourly | 7/29 | Comment for Today Mon, Jul 30 | 7/30 | 7/31 |
| | 6a noon 6p | | | | |
