

Keeping the Park Open is "Snow" Easy Task

What were you doing at 4:00 am this morning? If you were a member of the Crater Lake roads crew, you'd have been reporting for duty!

Trying to keep Highway 62 and the road to Rim Village open year-round is no easy task. Each day, the park's heavy equipment operators work from 4:00 am to 8:00 pm, in two different shifts, clearing snow and sanding roads. During heavy storms, snow removal becomes a 24-hour operation, with crews working 12 hours at a time.

Snow plows were first used at Crater Lake in 1930. Prior to that, crews used shovels and dynamite to clear the roads each spring. Today, the park employs 6 operators and 2 mechanics who use both push plows and rotary plows. The rotary plows are equipped with a fan that can shoot snow 75 to 80 feet (24 meters) into the air. To control where the snow lands, the operator can vary the angle and volume of output.

The amount of snow moved each winter by the park's roads crew is astounding. With it, you could create a ski trail 3 feet (91 cm) wide, 6 inches (15 cm) deep, and long enough to circle the Earth at the equator!

Steve Thomas is one of the park's most experienced equipment operators, having started here in 1979. Even after decades on the job, he still finds the work challenging. (continued on back page)

One Lake, Many Moods

Crater Lake is unpredictable. No matter how many times you've seen it before, you can never be sure exactly what to expect on your next visit to the rim. The lake's appearance is ever-changing and often surprising. This is especially true in the winter—perhaps the best time of year to witness Crater Lake at its most wild and beautiful.

The lake's character depends partly on the wind. On many winter days, strong winds whip across the water. The strongest gusts materialize as whitecaps and can be seen marching, like angry armies, across the width of the lake. Calm days in the winter are few and far between, but, when they occur, the scene is entirely different. The lake becomes a mirror and reflects the sky in perfect symmetry; the air is so quiet you can hear a pine needle drop.

The lake's appearance (or lack thereof) also depends on cloud cover. Roughly 50% of the time in the winter and early spring, storms completely hide the lake from view. While disappointing for visitors who have driven hours to get here, it's during these periods of rain and snow that the lake is replenished. Crater Lake wouldn't be America's deepest lake without such wet winters, which dump an average of 43 feet (13 meters) of snow at Park Headquarters.

Clouds also create scenes of stunning drama. When storms end, the lake's features slowly reveal themselves to fortunate onlookers. And once every few years, some lucky visitors reach the rim to find a "smoking cauldron"—the crater filled with fog, under a blue sky (see photo above). This occurs when cold, moist air becomes trapped in the caldera during a temperature inversion.

Sometimes, too, Crater Lake is masked by ice. It forms along the shore during cold snaps. Seeing the lake entirely frozen over, however, is a once-in-a-lifetime experience (the lake's tremendous depth makes its surface freezeresistant). In 1949, the last time the lake became ice-bound, it froze for 2½ months and a thick layer of snow accumulated on top. Typically, though, seeing bergs of snow and ice in the water is simply an indication that an avalanche has recently occurred on the inner walls of the caldera.

With so many variables (and we haven't even mentioned the color of the water, which can vary from bright blue to slate gray, with hues of red, orange, and purple at sunrise and sunset), Crater Lake is never the same lake twice. And thank goodness! Its unpredictability is one of its finest attributes, one that makes visiting (and re-visiting) the park such a delightful and rewarding activity.

Snowshoe with a Park Ranger

Ranger-led snowshoe walks are a fun way to experience the winter wonderland of Crater Lake National Park. Walks are offered every Saturday and Sunday (and some holidays) at 1:00 pm from late November through the end of April. Walks will also be offered on weekdays from December 17 through January 2. Snowshoes are provided free of charge and no previous snowshoeing experience is necessary.

The walks last 2 hours and cover 1 to 2 miles (1.6–3.2 km) of moderately strenuous terrain. The route is up to the ranger, but most walks begin at Rim Village and explore the forests and meadows along the rim of the caldera. Along the way, participants discover how plants, animals, and Crater Lake are shaped by the forces of winter.

Space on each tour is limited, and advance reservations are recommended. You can sign up at the Steel Visitor Center or by calling 541-594-3100. Participants should be at least 8 years old, be in reasonably good physical condition, and come prepared with warm clothing and waterresistant footwear.

School groups, outdoor clubs, and other organized groups of 10 or more people can arrange for their own ranger-led walk, staff permitting. Group walks are available on weekdays and weekends.

Park Profile

Crater Lake National Park protects the deepest lake in the United States. Fed by rain and snow (but no rivers or streams), the lake is considered to be the cleanest and clearest large body of water in the world.

The lake rests inside a caldera formed 7,700 years ago when a 12,000-foot-tall (3,600-meter) volcano collapsed following a major eruption. The eruption may have been the largest in North America in the past 640,000 years. Later eruptions formed Wizard Island, a cinder cone near the southwest shore.

The park is central to the cultural traditions of local American Indian tribes, whose ancestors witnessed the lake's formation.

Today, old-growth forests blanket the volcano's outer slopes, harboring a wide variety of plants and animals, including several rare species. The park provides unique opportunities for scientific study and public enjoyment.

- Park established: 1902
- Size: 183,000 acres (74,060 hectares)
- Lake depth: 1,943 feet (592 meters)Lake width: 4.5 to 6 miles (7 to 10 km)
- Annual snowfall: 43 feet (13 meters)
- Last time the lake froze over: 1949

Watch the Park Film

Curious to learn more about Crater Lake? Stop by the Steel Visitor Center to watch the park's 22-minute introductory film. It examines the park's significance and the wonder that Crater Lake has inspired for generations. The film, entitled *Crater Lake*: *Into the Deep*, also includes dramatic underwater footage along with state-of-the-art animation that depicts the lake's violent, volcanic past.

Regional Map

Crater Lake National Park is open year-round, 24 hours a day. Some roads, trails, and facilities, however, are closed seasonally due to snow.

Eugene

Grants

Much of the year, the park's North Entrance Road and Rim Drive are closed to cars. They close for the season on November 1 (or earlier if there is significant snowfall). Crews begin removing snow from these roads in April, but opening dates vary. The North Entrance Road and West Rim Drive tend to open in early June. The East Rim Drive typically opens in early July.

Highway 62 is plowed daily and open year-round, as is the 4-mile road from Highway 62 to Park

Headquarters. The 3-mile road from Park Headquarters to Rim Village is also kept open as much as possible (typically about 80% of the time in the winter), but it tends to close during periods of heavy snow. When the road is open and weather permits, Rim Village offers spectacular views of Crater Lake. For current road and weather conditions, call 541-594-3100.

> The observation room is accessnowbank, which is often 10 to 15 feet (3 to 4.6 meters) tall. Be

In the winter, the park's North Entrance Road is groomed for snowmobiles, which may travel as far as the rim of Crater Lake. Snowmobiles must stay on the groomed and marked route; they are not allowed on the Rim Drive, and off-route travel is prohibited.

The snowmobile route is open as conditions permit, typically from December through March.

Mazama Loop

When skies are clear, excellent views of Crater Lake can be obtained at Rim Village. During typically obscured by clouds. The lake is completely "invisible" about 50% of the time in the winter and early spring! To avoid weather forecast before you leave home. To check visibility at Rim Village, visit the park's website (www.nps.gov/crla) to view a webcam pointed toward the lake.

A partial view of Crater Lake can usually be obtained from an observation room on the top floor of the Rim Village Café & Gift Shop. sible via elevator. For a better view of the lake (and when deep snow blocks the view from the observation room), you'll need to climb to the top of a snowbank and take 20 to 30 steps across the snow. A "snow ramp" across from the Rim Village restroom building provides the easiest access to the top of the careful—the snow ramp can be icy and slippery, and dangerous snow cornices overhanging the rim of the crater can be difficult to spot. Stay back from the edge!

Snowmobiling

Diamond Lake Resort, located 5 miles (8 km) north of the park, offers snowmobile rentals

Headquarters-

and guided tours into the park. Renting a 1- or 2-person snowmobile costs \$110 for 2 hours, \$160 for 3 hours, \$210 for 4 hours, or \$325 for 8 hours, plus the cost of fuel. Discounts are available for overnight guests. Guided tours into Crater Lake National Park are available with 48 hours advance notice. Guide service costs \$55 per hour. Most guided trips to the rim of Crater Lake last 3 hours. For more information, call 1-800-733-7593 or visit www. diamondlake.net.

Backcountry A Camping

Backcountry camping is allowed in the park year-round. Winter offers well-prepared skiers and snowshoers opportunities to experience occasions of unique beauty and solitude. All campers must obtain a free backcountry permit, in person, from either the Steel Visitor Center or nearby Ranger Station during regular hours of operation.

out-and-back along the West Rim Drive. The most popular multinight trip is the 31-mile (50-km) circuit around Crater Lake (see box, above right). Snow camping is required; there are no public huts or shelters. Campers must be at least 1 mile (1.6 km) from the nearest plowed road and out of sight of any ski trail or route. For trip-planning advice and a complete list of regulations, stop by the Steel Visitor Center or call 541-594-3100.

The most popular overnight trip is

The park features a wide variety of marked trails and unmarked routes for cross-country skiers (see list on right). The trails are not groomed, so skiers will often need to break trail, sometimes through deep snow. Conditions vary greatly, from powder to slush to ice. Ask at the Steel Visitor Center for trail recommendations.

Skiing is prohibited on Highway 62, the road to Rim Village, and in parking lots. Skiing inside the caldera is also strictly prohibited. The park does not rent skis. Ask at the Steel Visitor Center for a list of rental locations outside the park.

Sledding

hills or snow-play areas in the park, but many opportunities for sledding can be found. For your safety, sledding, innertubing, and tobogganing are prohibited on Highway 62, the road to Rim Village, and in parking lots. Please select areas that have gentle slopes, are free of trees and other obstructions, and that provide a safe, flat runout area. Several such locations exist near Rim Village; a popular spot is the open meadow near Crater Lake Lodge.

Snowboarding

be used. Snowboarders should caldera is strictly prohibited.

Snowshoeing

Crater Lake National Park is a snowshoer's paradise. To avoid getting lost, first-time visitors are advised to follow one of the park's many ski trails. As a courtesy to skiers, please refrain from walking on ski tracks. Snowshoeing is allowed everywhere except inside the caldera, on Highway 62, on the road to Rim Village, and in parking lots.

Snowshoe rentals are available at the Rim Village Gift Shop. Adult snowshoes are \$16 per day, kids snowshoes are \$12.50 per day, and hiking poles are \$4 per day. backcountry campers. Renting park's ranger-guided walks (see page 1), during which snowshoes are provided free of charge.

Snowboarding is allowed in the park, but extreme caution should be experienced in avalanche safety and winter backcountry travel. Snowboarding inside the Snowboarding is also prohibited on roads and parking lots that are open to automobile traffic.

West Rim Drive

Dutto Creek Trail

to Park

Headqua and 62

Distance from Rim Village: 1.2 mi. (1.9 km) Discovery Point is a popular summer pullout on the West Rim Drive. The overlook offers a fine view of Wizard Island and marks the spot where gold prospector John Hillman first set eyes on Crater Lake in 1853. The overlook is not signed but is fairly obvious as a broad, level viewpoint.

■ Wizard Island Overlook

nis small, unmarked viewpoir an even better bird's-eye view of Wizard Island. The island is a cinder cone that erupted out of Crater Lake around 7.300

■ Union Peak Overlook

Distance from Rim Village: 3.1 mi. (5.0 km) The next road segment is a steady climb, gaining 240 feet (73 meters) in elevation. On a clear day, the ascent is worth the effort: just before the road curves sharply to the right, a small, unmarked viewpoin on the left offers long-distance views of the Cascade Mountain Range. Union Peak, the core of an old volcano, stands 8 miles (13 km) to the south. To the left of Union Peak is Mt. McLoughlin, 35 miles (56 km) away. The views often extend as far as Mt. Shasta, 100 miles (161 km) distant.

■ Beyond Union Peak Overlook

Distances from Rim Village-Watchman Overlook: 3.9 mi. (6.3 km) Diamond Lake Overlook: 4.6 mi. (7.4 km) North Junction: 6.0 mi. (9.7 km) Exploring further requires caution. Just peyond Union Peak Overlook, the road s cut into a cliff. When this roadcut fills with snow, it may be advisable to leave the road and bypass the cliff higher up on the slope. Next, the road traverses the north face of Watchman Peak, an avalancheprone slope that is sometimes dangerously cy. Do not hesitate to remove your skis

Circling the Lake

Each winter, approximately 80 skiers and 40 snowshoers travel all the way around Crater Lake. It's a trip that can be exceptionally rewarding, rich with spectacular views. It can also be physically and mentally demanding a test of endurance and outdoor skills.

When the weather is clear, the 31-mile (50-km) loop takes an average of 3 days to complete. Storms, however, force many parties to turn back or to spend an extra night. The route is unmarked, difficult to follow in places, and crossed by a number of avalanche paths. Those attempting the trip should be experienced in winter camping, backcountry travel, and avalanche safety A backcountry permit is required.

Although the loop can typically be done anytime between late November and early May, the most popular months are March and April. Spring provides more hours of daylight than the winter months and longer periods of clear weather.

Distance: 1.3 mi. (2.1 km) loop trail

This enjoyable loop trail offers a lot of

variety. It explores a forest of mountain

hemlock trees punctuated by meadows

but traveling counterclockwise provides

turns. In this direction, the trail begins by

more interesting downhill slopes and

climbing 45 feet (14 meters) to its high

point. It then drops 200 feet (61 meters)

in elevation before gaining 155 feet (47

meters) on its return to Rim Village. The

trail is marked with blue diamonds in the

trees and, from December through March,

orange snow poles in the meadows.

Trailhead: Snow ramp across from the entrance to the Rim Village Café & Gift

Shop. The trail can also be accessed from

a snow ramp near Crater Lake Lodge and

a roadside pullout approximately 1.5 mi.

The East Rim Drive is a good alternative

to the West Rim Drive on windy days.

The forested route provides protection

from the elements and, upon reaching

Sun Notch, a spectacular view of Crater

Lake and the Phantom Ship. The route

is not marked, but skiers should have

no trouble following the path of the

underlying road, which is unplowed from

November to mid-June. The route is rated

"intermediate" because it features longer

avalanche. Trips of varying lengths are pos-

sible. Most skiers attempt to reach one of

the following destinations before return-

ing. Trailhead: Roadside pullout 150 yards

(137 meters) south of Park Headquarters.

Rim Visitor Center

--- Ski Trail or Route

Pedestrian Access

Plowed Road

Crater Lake National Park features many miles of marked ski trails and unmarked routes. The most popular are described here. The trails are not groomed and some may be hard to follow; ask at the Steel Visitor Center for more information.

EASIER TRAILS

Mazama Loop Distance: 1.7 mi. (2.7 km) loop trail Recommended for beginning skiers, this flat trail loops through Mazama Village Campground and provides views into Annie Creek Canyon. It is marked with blue diamonds attached to the trees and, from December through March, orange snow poles in the clearings. Trailhead: 4 mi. (6.4) km) south of Park Headquarters, just north

of the summer fee booth and Highway 62.

West Rim Drive

This is the park's most popular ski route, providing spectacular views of Crater Lake and Wizard Island. It follows the West Rim Drive, which is unplowed from November to mid-April. The route is not marked, but the path of the underlying road is generally apparent. The route features gently rolling terrain and is suitable for skiers of all abilities. Be aware, however, that conditions are often icy and windy. Occasional forested areas provide some protection from the wind. Trips of varying engths are possible. Most skiers attempt to reach one of the following destinations before turning back to Rim Village.

■ Discovery Point

Distance from Rim Village: 2.3 mi. (3.7 km)

The road dips gently for the first half mile (.8 km), losing 115 feet (35 meters) of elevation while passing the park's residential area. Then begins a steady climb, which in 1.3 miles (2.1 km) gains 436 feet (133 meters). The climb is popular with skiers looking for a short, invigorating workout. Views from the summit are limited, but

is visible on the skyline straight ahead.

■ Vidae Falls Distance from trailhead: 3.1 mi. (5.0 km) Vidae Falls is a spring-fed cascade that drops 100 feet (30 meters) over a series of ledges on the west side of the road In the winter, it is sometimes a beautiful lattice of ice. Other times, it is completely buried by snow. From the summit of the first climb, the road descends gradually to Vidae Falls, losing 191 feet (58 meters) of elevation. Along the way, it traverses a potential avalanche area, which, if conditions warrant, can be avoided by taking the marked Vidae Ridge Avalanche Bypass Trail. (A detailed map of the bypass trail is

available at the Steel Visitor Center.)

on the return trip Crater Lake Lodge

■ Sun Notch

Distance from trailhead: 4.5 mi. (7.2 km) To view Crater Lake, skiers must continue on to Sun Notch, gaining an additional 505 feet (154 meters) of elevation. Skiers must also cross—or bypass—a second

avalanche zone. (A detailed map of the Applegate Avalanche Bypass Route is available at the Steel Visitor Center.) Sun Notch itself lies .25 miles (.4 km) north of the East Rim Drive. To find it, leave the road at the apex of the sweeping righthand curve; the turnoff is not marked. The view from Sun Notch is dramatic. Nearly 1.000 feet (305 meters) above the water it directly overlooks a rocky island known as the Phantom Ship. Stay back from the edge of the caldera and its dangerous, overhanging snow cornices.

■ Garfield-Applegate Ridge

Distance from trailhead: 3.2 mi. (5.1 km) Another lake-viewing option for snowshoers and advanced skiers is to attain the caldera's rim between Garfield Peak and Applegate Peak. This is an unmarked but straightforward ascent through open meadows and groves of trees. Leave the East Rim Drive near the summit of the first climb. The rim is 1.4 miles (2.3 km) due north, with an additional elevation gain of 950 feet (290 meters).

ADVANCED TRAILS

Raven Trail

Distance: 1 mi. (1.6 km) The Raven Trail is a favorite of park rangers after work. It descends steeply from Rim Village to Park Headquarters, dropping 610 feet (186 meters) in elevation. It is almost always skied one-way, downhill which requires two vehicles or a shuttle to the top. When icy, the trail can be dangerously fast, with two very steep sections. It flattens out halfway to Park Headquarters, where it crosses the base of a large avalanche chute then runs parallel to the road to the lower trailhead. During times of heavy snow, when the road to Rim Village is closed, the trail is also used by snowshoers who hike up it to view the lake. Upper Trailhead: Snow ramp near Crater Lake Lodge. Ski east along the rim then follow blue diamonds down through the trees. Lower Trailhead: Roadside pull out 150 yards (137 meters) south of Park

Dutton Creek Trail

Distance: 4.6 mi. (7.4 km) This trail is little used but offers a fun and challenging backcountry experience It is typically skied from north to south and therefore requires two vehicles or a shuttle. The top section, in places, is steep It descends through a forest of mountain hemlock and red fir, dropping 1,000 feet (305 meters) in 2.5 miles (4 km) to meet the Pacific Crest Trail. The trail then climbs 250 feet (76 meters) to a junction. The left fork descends to Mazama Village; the right fork continues along the PCT to a trailhead on Highway 62. The trail is marked with blue diamonds and some older orange and red blazes, but skiers should carry a topographic map and a compass or GPS Trailhead: Snow ramp across from the Rim Village restrooms. Ski west, just past Rim Village, and look for the trailhead sign on the south side of West Rim Drive.

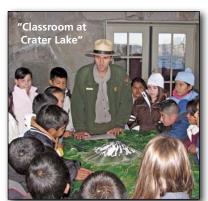

Support Your Park—

Shop in the Visitor Center Bookstore

When you shop in the visitor center, all proceeds from your purchase are invested back into the park. The bookstore is operated by the Crater Lake Natural History Association, a nonprofit organization established in 1942 to support the park's educational and scientific programs.

The association funds a variety of projects, including the printing of this visitor guide. Some of the bookstore's offerings are described to the right. For a complete list of merchandise and to buy items online, visit www.craterlakeoregon.org. You can also order by calling 541-594-3111.

Buy Crater Lake License Plates

If you live in Oregon, consider choosing Crater Lake license plates for your vehicle. For a one-time charge of \$20, you can outfit your car with these beautiful plates while supporting park projects. You can purchase Crater Lake plates at any time, not just when buying a new vehicle or renewing your registration. Visit any Oregon DMV office or www.oregon.gov/odot/dmv for details.

Proceeds go into an endowment that funds the operation of the park's Science and Learning Center. The center opened in 2006 and consists of two renovated historic structures near Park Headquarters: the original Superintendent's Residence and Chief Naturalist's Residence. These buildings now provide living and working space for visiting scientists, teachers, and artists.

The Science and Learning Center draws researchers and educators to Crater Lake from around the world, encouraging them to use the park as an outdoor laboratory and classroom. For more information about the Science and Learning Center and its programs, visit www.nps.gov/rlc/craterlake.

Volunteer Your Time

Looking for a hands-on way to help the park? Consider sharing your time and talents as a Crater Lake VIP (Volunteer-In-Parks). Full-time volunteers are needed throughout the year to help staff visitor centers and present interpretive programs. Opportunities are advertised several times each year at www. volunteer.gov. Volunteers are provided free housing in exchange for 3 months of service.

To assist with special projects or volunteer periodically, join The Friends of Crater Lake, a non-profit organization founded in 1993. Members remove non-native plants, build

and maintain trails, contact visitors, operate a winter information desk at Rim Village, and assist with special events. Learn more at www.friendsofcraterlake.org.

The Crater Lake Ski Patrol has been assisting winter visitors and maintaining the park's cross-country ski trails since 1983. Members, identifiable by their bright red parkas, receive training in wilderness first aid, survival skills, search and rescue, map and compass use, and avalanche safety in exchange for at least 6 days of service. For more information, visit www.craterlakeskipatrol.weebly.com.

Contribute to the Crater Lake Trust

The Crater Lake National Park Trust is a nonprofit organization that raises private funds to support park projects and connect the park with surrounding communities. It helps fund, for example, field trips to the park for more than 5,000 grade-school students each year. In a program called "Classroom

at Crater Lake," kids engage in hands-on science and learn about wildlife, old-growth forests, and winter ecology. For most of the kids, it's their first visit to the park. To learn more about the Trust and its activities, visit www.craterlaketrust.org. Share your love of the park by making a tax-deductible gift.

Whether you have a compliment, concern, or suggestion, we'd like to hear from you! This is your national park, and we value your input on how best to manage it. You can provide feedback in several ways. Fill out

a comment form at the visitor center, send an email to craterlake@nps.gov, or write to: Superintendent, Crater Lake National Park, PO Box 7, Crater Lake, OR 97604.

Keeping the Park Open

(continued from page 1)

"It can be a hazardous job," reports Steve, "especially when it's dark and white-out conditions are occurring. On a winding mountain road, you never know what's around the next corner. It could be a tree across the road at windshield level, or a car stuck in the snow."

Despite the hazards—which also include rare, but potentially deadly, avalanches—Steve says the rewards are even greater. "It's very fulfilling to be able to provide a service to people that allows them to experience the incredible beauty of Crater Lake. And being able to ski and hike from the front door of my house is a nice fringe benefit."

The most challenging part of the job is "Spring Opening," when the equipment operators turn their attention to opening up the 30-mile (48-km) Rim Drive and 9-mile (14-km) North Entrance Road for the summer. They begin on the West Rim, departing Rim Village around the 3rd week in April. On average, the snow they encounter is 20 to 30 feet (6 to 9 meters) deep. In the vicinity of Watchman Peak, they meet drifts 45 to 50 feet (15 meters) thick.

The crews head slowly north, averaging .25 miles (.4 km) of road cleared per day. In a good year, they'll reach the park's North Entrance in late May. After a severe winter, it will take until mid-June. The East Rim Drive is their final leg. "If we can get all the way around the lake by the 4th of July," Steve says, "we're happy."

For your safety, when you encounter a snow plow in the park, please give it a wide berth. Passing a plow on the park's narrow roads can be dangerous. Wait until an intersection or until the plow comes to a stop and the operator waves you by. Until then, assume that the operator can't see you; visibility from inside the plows can be poor. Also, skiers and pedestrians should be sure to keep well away from the dangerous cascade of snow thrown by the rotary plows.

Thanks to the hard work, long hours, and dedication of the park's heavy equipment operators and mechanics, we can access and enjoy Crater Lake National Park every month of the year.

Climate Chart

Crater Lake National Park is one of the snowiest inhabited places in America. Storms from the Pacific Ocean dump an average of 43 feet (13 meters) of snow at Park Headquarters. That's equivalent to 1.4 inches (3.6 cm) of snow every day for an entire year! The park's tremendous snowfall is a result of its position at the crest of the Cascade Mountains.

Data is from Park Headquarters, 1931-2015.
